and doc. PaedDr. Pavel Doulík, PhD. Dean of Faculty of Education,  
JEPU in Ústí nad Labem

---

Invitation

8.–9.10.2013 Nitra

Scientific Symposium aims to create a space for discussion among experts from community of pedagogues, psychologists and field didactics on themes and scientific issues of interdisciplinary and transdisciplinary nature, which affect the quality and efficiency of educational results.

Subjects of discussion are issues and problems of psychodidactic and neurodidactic comprehension of education and context of diversity of pupil and student population in pro-inclusive orientation of education from kindergarten to university. Our goal is to pass discussion beyond research tasks and professional connotations of prominent personalities of pedagogy, psychology and didactics not only in Slovakia and Czech Republic, but considerably in wider international provenance in sections and workshop..

**We encourage you to accept the invitation and to enrich our discussants in plenary, in individual sections or workshops.**
